

McScM - Bug # 22: --help output not sensitive to terminal's characterwidth

Status:	New	Priority:	Normal
Author:	Alexander Heußner	Category:	
Created:	07/05/2010	Assignee:	Alexander Heußner
Updated:	04/08/2011	Due date:	
Subject:	--help output not sensitive to terminal's characterwidth		
Description:	the output of the command line argument @--help@ does ignore the width of the terminal and does line-wrap a lot on standard 80 character consoles; this makes the output pretty "unreadable".
