

McScM - Bug # 59: Account for k-max in trace-checking engines

Status:	New	Priority:	Normal
Author:	Grégoire Sutre	Category:	
Created:	09/08/2011	Assignee:	Grégoire Sutre
Updated:	09/08/2011	Due date:	
Subject:	Account for k-max in trace-checking engines		
Description:	Trace-checking engines APlnv/UPInv should abort if they must increase k beyond k_max to compute a trace invariant.
